Course Context

- Interactive and practical.
- Learn from the class examples & stories
- Link number vibrations to tarot & astrology
- Learn how to blend with other numbers

The development of numbers is thought to be linked with the study of the sky by our ancient ancestors, the Chaldeans, Essenes, Egyptians and Hindus. Pythagoras of Samos, living around 500 BC, formed the first school of mathematics within his secret philosophical society. He believed that the entire cosmos revolved around the system of numbers, each associated with their own vibration or harmonic, which could be used to determine its nature.

Pythagoras developed the uncanny system taught in this course, using the energies around the time and name at birth to understand the individual's personality and make sense of the lessons they have come to learn in this lifetime.

Becoming aware of my numerology profile suddenly made sense of my life, the opportunities I've experienced and the challenges I face! In the hundreds of numerology readings I've undertaken, I have never encountered a person who didn't resonate with the messages received from their numbers.....
